Global rules

Design style reference:

Clean, premium and trustworthy interface.

Inspirations:
• Apple-level clarity
• Kalshi structure
• Premium sportsbook UI
• Minimal crypto aesthetics

Avoid:
• cluttered trading interfaces
• overly technical UI
• dark crypto-style chaos

Focus on:
• clarity
• trust signals
• event context
• easy trading

VISUAL STYLE BRIEF

VISUAL STYLE BRIEF

Product positioning

Prediction market platform
Clean financial interface
Premium feel
Accessible for mainstream users

Style inspiration:

Robinhood
Apple Stocks
Stripe Dashboard
DraftKings (minimal parts)

DESIGN PRINCIPLES

1. Clarity first

Numbers must be easy to read
Profit must be instantly visible

---

2. Minimal cognitive load

Avoid:

complex trading interfaces
crypto exchange visuals
dense charts

---

3. Trust-first design

Must look like:

financial platform

not

gambling site

VISUAL HIERARCHY PRIORITY

1 Market question
2 Probability
3 Profit outcome
4 Trust signals
5 Secondary metadata

Do not let secondary metadata visually compete with the market question, probability, or profit outcome.

COLOR SYSTEM

Background

Primary background

#F7F8FA

Clean light background.

Primary text

#111111

Strong contrast.

Secondary text

#6B7280

Muted grey.

YES color

#16A34A

Green.

NO color

#DC2626

Red.

Accent color

Use sparingly.

#2563EB

Blue.

Used for:

- buttons
- highlights
- links

BUTTON STYLE

Primary button

Background: blue

Text: white
Border radius: 12px

Example:

Buy YES

Outcome buttons should also use color cues.

YES

green border

NO

red border

NOTE: Buttons must not visually overpower probability, profit outcome, or market question.
CTA buttons should feel premium and restrained, not loud or promotional.

CARD DESIGN

Market cards and position cards.

Style:

White background
Soft shadow
Rounded corners

Example:

border-radius: 16px
shadow: soft
padding: 20px

TYPOGRAPHY

Primary font

Inter

or

SF Pro

Font sizes

Page title

28px

Market question

22px

Probability

24px

Secondary info

14px

PROBABILITY DISPLAY

Example

YES 63%
NO 37%

YES

green

NO

red

Numbers must be **large and bold**.

SPACING SYSTEM

Use consistent spacing scale.

8px
16px
24px
32px
48px

Never random spacing.

MARKET CARD LAYOUT

Example structure

Category

Market question

YES 63%

Volume €420K
Closes in 12 days

Liquidity confidence

High liquidity

TRADE CARD STYLE

YES card
Green accent border
Very subtle green tint (5–8% opacity maximum)

NO card
Red accent border
Very subtle red tint (5–8% opacity maximum)

The cards should feel premium and restrained, not loud or casino-like.
Use color as a signal, not as a dominant surface.

Example

YES

If Bulgaria adopts the Euro

You win €15.87
Max loss €10

PORTFOLIO NUMBERS

Profit must be very clear.

Positive

green
+€24

Negative

red

-€12

CHART STYLE

Keep charts minimal.

No trading complexity.

Use:

simple line chart

Time filters

1H
1D
1W
ALL

MOBILE-FIRST DESIGN

Most users will trade from mobile.

Layout must prioritize:

large buttons
clear numbers
vertical flow

MICROINTERACTIONS

Examples

Trade success

Trade placed successfully

Small animation on success.

EMPTY STATES

Example

Portfolio empty state

You have no active positions yet.

Explore markets to make your first prediction.

Button

Browse markets

DESIGN MOOD

Designer should aim for:

clean
confident
minimal
financial

Avoid:

neon
crypto gradients
casino effects

- **active tab highlighted**

SECTION 4

⭐ MAIN EVENT

This is the hero market.

⭐ Main Event

Politics

Will Bulgaria adopt the Euro before Jan 1, 2026?

YES 63% NO 37%

Invest €10 → Win €15.87

Volume €420K

Closes in 12 days

Confidence: High liquidity

Why it matters:

EU Commission confirms progress on Euro roadmap

Mandatory fields

- **category**
- **question**
- **YES / NO probability**
- **profit preview**
- **volume**
- **closing time**
- **confidence**
- **context line**

Profit preview format

Invest €10 → Win €X

Confidence options

High liquidity

Medium liquidity

Low liquidity

RULE

Only one Main Event card is allowed on Home.

Do not create multiple hero cards.

SECTION 5

🔥 TRENDING BULGARIAN MARKETS

Large cards

Example card

Sports

Will Ludogorets win the Bulgarian efbet Professional “A” League in 2026?

YES 71% NO 29%

Invest €10 → Win €14.08

Volume €190K

Closes in 45 days

Confidence: Medium liquidity

Fields required

- **category**
- **question**
- **probability**
- **profit preview**
- **volume**

- closing time
- confidence

Context optional here.

SECTION 6

📈 MOST TRADED TODAY

Medium cards

Crypto

Will Bitcoin exceed €100K before 2027?

YES 41% NO 59%

Invest €10 → Win €24.39

Volume €1.2M

Closes in 140 days

Confidence: High liquidity

SECTION 7

🆕 NEW MARKETS

Same card structure.

Economy

Will Bulgaria join OECD before 2028?

YES 44% NO 56%

Invest €10 → Win €22.73

Volume €35K

Closes in 320 days

Confidence: Low liquidity

SECTION 8

HOW PREDICTION MARKETS WORK

💡 How Prediction Markets Work

1 Choose YES or NO

2 Price reflects market probability

3 Trade anytime before resolution

4 If your prediction is correct, you profit

Example

Buy YES at 63%

€10 → €15.87 if correct

Rules

- **always visible**
- **always last section**
- **visible without login**

Politics

Market question
Will Bulgaria adopt the Euro before Jan 1, 2026?

Volume €420K
Closes in 12 days

Liquidity confidence
High liquidity

Why it matters
EU Commission confirms progress on Euro roadmap

Purpose:

- context
- trust
- liquidity clarity

RULE

A compact context summary must remain visible above the trade module.

SECTION 2

PROBABILITY DISPLAY

YES 63%
NO 37%

Market probability based on trader positions

Important rule:

Probability must always appear before trade options.

SECTION 3

TRADE AMOUNT

Amount

[€10]

Quick amounts

€5 €10 €25 €50

Purpose:

- reduce friction
- fast mobile trading

SECTION 4

OUTCOME TRADE CARDS (OPINION-FIRST UX)

YES CARD

YES

If Bulgaria adopts the Euro

You win €15.87
Max loss €10

[Buy YES]

NO CARD

NO

If Bulgaria does NOT adopt the Euro

You win €10.52
Max loss €10

[Buy NO]

Important UX rule:

Outcome description must be visible,
not just YES / NO labels.

SECTION 5

EXECUTION PREVIEW

Trade preview

Estimated fill price: 0.64
Estimated slippage: Low
Trading fee: €0.12

Purpose:

- prevent execution confusion
- build trust

This solves a **major complaint in Polymarket and Kalshi**.

SECTION 6

TRADE BUTTON

When YES selected:

Confirm Buy YES

When NO selected:

Confirm Buy NO

SECTION 7
